Profile

Solution-oriented frontend developer with almost 2 years of experience building scalable ERP systems and web applications. Proficient in React, TypeScript, and Clean Architecture, with a proven track record in leading teams, implementing role-based access control, and optimizing performance. Skilled in collaboration, technical documentation, and delivering user-centric solutions.

PROFESSIONAL EXPERIENCE

ReactJS Team Lead Developer, ExaSoft

11/2023 – Present

Tashkent

Developed user interfaces for an ERP system with CashFlow, HR, POS, Balance, and WMS modules using React, TypeScript, and Ant Design, improving system efficiency by 15%.

- Designed and implemented role-based access control (RBAC), securing 100+ user roles and resolving large-scale permission issues.
- Led the migration of the ERP system frontend to Clean Architecture, restructuring the codebase into domain, application, and presentation layers, reducing technical debt by 25%.
- Optimized performance for large datasets using React Query and lazy loading, reducing data retrieval latency by 30%.
- Integrated REST APIs for seamless data exchange across ERP modules and other web applications.
- Led a team of frontend developers, conducting code reviews and implementing Agile/Scrum practices, reducing sprint delivery time by 20%.
- Mentored junior developers, improving code quality and team productivity through training and pair programming.
- Coordinated with backend and design teams to ensure alignment on project requirements and deliverables.

Projects

Window and Window Elements Management System

2024 – 2025

- Designed a web admin panel for managing window packages (CRUD operations, catalog, color, pricing) using React, TypeScript, and Ant Design
- Implemented dynamic UI components, improving administrative efficiency by 25%

ERP System

2023 – present

- Developed a modular ERP client using React, TypeScript, and Tailwind CSS, featuring 60+ pages for Accounting, HR, Budgeting, CashFlow, WMS, and POS.
- Implemented responsive dashboards with ApexCharts for real-time analytics, improving decision-making efficiency by 15%.
- Built role-based access control (RBAC) and integrated REST APIs, ensuring secure and seamless data management across modules

Tri-Logistics Website

2024

- Developed a responsive logistics website using React and TypeScript, featuring multi-language support, interactive product catalog, and car carousel
- Applied modern UI/UX practices with Ant Design, enhancing user engagement by 20%.
- Integrated dynamic content management for seamless updates and improved user experience

SKILLS

Technical Skills

- Languages & Frameworks: HTML, CSS, Sass, Tailwind CSS, Bootstrap, JavaScript (ES6+), TypeScript, React, Next.js, Redux, Zustand, React Query.
- UI Libraries: Ant Design, Material UI, Chakra UI, and others.
- Testing: Vitest, Jest.
- Tools & Platforms: Git, GitHub, Trello, Notion, ClickUp.
- Architecture & Patterns: REST APIs, Repository Pattern, SOLID, DRY, Clean Architecture.

Soft Skills

Communication, Collaboration, Problem-Solving, Time Management.

CERTIFICATES

React Developer Certification -

Najot Ta'lim

October, 2023

EDUCATION

Frontend Development Course, Najot Ta'lim

03/2023 – 10/2023

Tashkent
